Let's discuss how we can help you.

ABOUT US

Kruger Blasting has provided a turnkey drilling and blasting solution to the quarry and civil construction industries since 1990.

Our efficient team comprises experienced and qualified drill and blast professionals passionate about meeting production targets. We are a Level 4 BEE contributor, based in Stutterheim in the Eastern Cape with contracts across South Africa.

Specializing in civil and open cast blasting, Kruger Blasting has completed a wide range of drilling and blasting projects over the past three decades

— with zero incident claims to date. We believe that safety and accuracy are crucial to a successful blast. They are a non-negotiable part of every project, and we complete all contracts in strict accordance with the regulations.

We have our own registered explosives magazine and fleet of reliable drill rigs, which enable us to offer competitive rates and take on new projects with zero logistical delays. At all times, we strive to meet production targets and achieve optimal fragmentation to ensure profitable business outcomes for our clients.

Our length and breadth of industry experience, coupled with our high-quality equipment and highly skilled staff, enable us to complete even the most challenging projects. We are acutely familiar with working in sensitive areas and offer a safe blasting solution close to built-up areas as well as existing water, road, and energy infrastructure.

If you're in need of a competent drill and blast contractor, then we're ready to deliver.

OUR SERVICES

Kruger Blasting specialises in drilling and blasting services for both the quarry and construction industries in South Africa. We have a long and proven track record, particularly in quarrying, road cutting, and the drilling and blasting of foundations and trenches for water reticulation systems.

QUARRY DRILL & BLAST SERVICES

The saying “time is money” has never been more true than in the context of a working quarry. Our qualified team of blasters, drill operators, and assistants are therefore committed to achieving production targets — on time, every time.

As specialists in opencast blasting, we are also acutely familiar with...

the quarry production process. Our comprehensive drill and blast service is therefore designed to maximise operational efficiency across the operational life cycle. At all times, we aim to achieve optimal fragmentation that leads to profitable business outcomes for our clients.

Kruger Blasting is proud to have devised an efficient formula for a finer, faster, and more cost-effective final product, as is evidenced by our record of successful projects.

CIVIL DRILL & BLAST SERVICES

The importance of partnering with competent contractors cannot be overemphasized during a civil construction project.

Our qualified team of drill and blast contractors are therefore committed to providing the best service possible — on time, every time.

Amongst others, we have gained

notable experience in road cutting as well as drilling and blasting of foundations and trenches for water reticulation systems. We are acutely familiar with working in sensitive areas and offer a safe blasting solution close to built-up areas as well as existing water, road, and energy infrastructure.

SPECIALIST SERVICES INCLUDE DRILLING AND BLASTING OF:

- Boulders in open, rural and residential areas
- Trenching for water reticulation systems in open, rural and residential areas
- Water storage foundations and trenches
- Wind energy foundations and trenches
- Road cuttings in open, rural and residential areas

In working alongside the country's top construction and civil engineering companies, we are proud to have achieved a successful track record that speaks for itself.

OUR TEAM

Our specialist team is passionate about providing expert drill and blast services. This includes our qualified civil and opencast blasters, drill rig operators, and retinue of assistants, who work tirelessly behind the scenes to meet production targets. At all times, our focus is on achieving optimal fragmentation to ensure profitable business outcomes for our clients.

OUR EQUIPMENT

We are fully equipped to meet production targets for bulk works and large-scale projects. Kruger Blasting has its own fleet of well-maintained drill rigs, compressors, and accessories. We are also licensed to trade in explosives and have our own registered explosive magazines in the Eastern Cape. Kruger Blasting is registered with the Construction Industry Development Board and the DOL. All our annual renewal documents are in order.

OUR PARTNERS

We have partnered with reputable and reliable suppliers to deliver the best possible service. This includes our partners for bulk mining explosives, non-detonating explosives, digital initiation systems, and blasting accessories.

OUR COMMITMENT TO SAFETY

We believe that safety and accuracy are key to a successful blast. They are a non-negotiable part of every project.

There is a strict Health and Safety plan in place, and we always ensure contracts are completed in strict accordance with the regulations.

Trust is a must in business — and with zero incident claims to our name, it's something we've successfully built up across the industry.

WHY WORK WITH US?

Kruger Blasting specialises in drilling and blasting services for both the quarry and construction industries in South Africa. We have a long and proven track record, particularly in quarrying, road cutting, and the drilling and blasting of foundations and trenches for water reticulation systems.

TURN-KEY SOLUTIONS

From concept to completion, we provide a comprehensive drill and blast solution to maximise efficiency across the project life cycle.

TARGET-DRIVEN

We are committed to meeting production targets and achieving optimal fragmentation to ensure profitable business outcomes.

SKILLED TEAM

Our team of qualified blasters and drill rig operators work tirelessly to meet targets on time, every time.

TRACK RECORD

Our record of successful projects is the evidence of our commitment to service excellence.
